

PROOF OF PERFORMANCE

Rotary Steerable System

JULY 2014

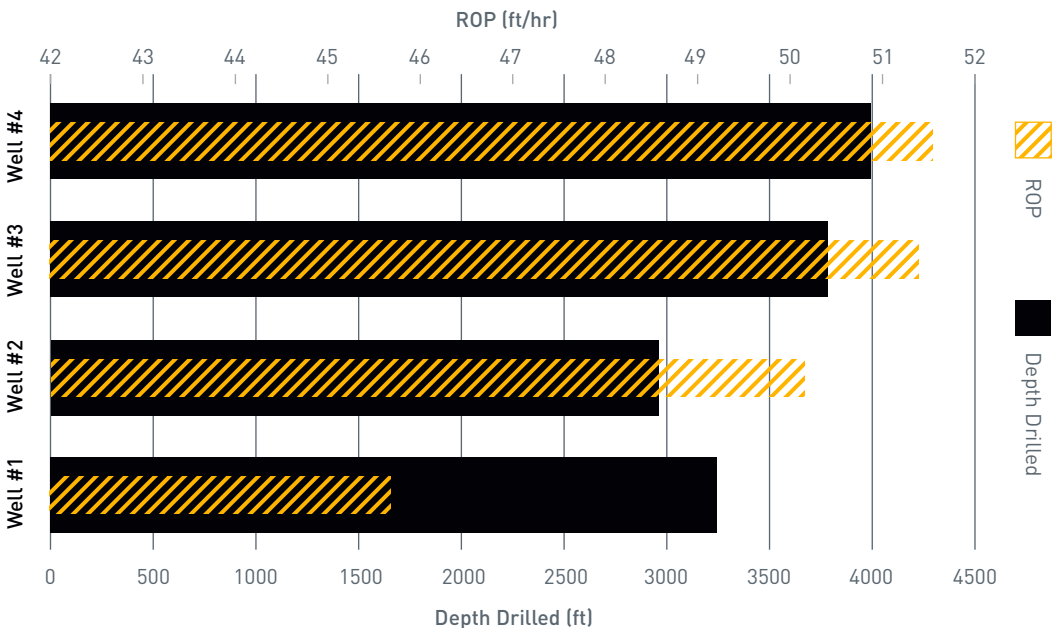

OBJECTIVE

An operator in Oklahoma who traditionally drills s-well profiles with conventional solutions was seeking a cost-effective alternative.

CHALLENGE

- Hit a predefined 30' cylinder, while maintaining high ROP.

RESULTS

Across a series of 4 wells, DoubleBarrel RSS was able to TD in all cases with a single tool. A high degree of downlinking success coupled with achieving consistent DLS of 3°/100ft allowed for the fastest well drilled in the area by client to date.

WELL PLAN
